

COMP 7210: Assignment 7

Due: March 6, 2012, 12 Noon

Objective: Write the solution methodology and evaluation sections of your proposal.

Detailed Instructions:

0. Incorporate the changes from Assignments 4 and 5 into your thesis proposal.
1. Write the solution methodology section of your proposal. Your section should describe:
 - Specific details or further questions about the problem that are not addressed in the problem statement section.
 - What tasks need to be done to complete the work.
 - What you plan to do to complete the work.
 - Any challenges to completing the solution that you are already aware of.
2. Write the evaluation section of your proposal. Be as detailed as possible.
 - Be specific about how you will evaluate your solution.
 - Will you compare your work to other works? Which?
 - What measurements will you take? Will you have multiple independent variables? What experimental design will you use?
 - If you are doing theoretical work, you should describe what type of analysis and techniques you will use.
3. **MAKE SURE** that your writing makes sense in the context of your other sections (background, related work and problem statement). You should avoid duplication of material from other sections. You should also ensure that material is incorporated into the appropriate section – background information should appear in the background section, etc. You should edit your entire submission at least once after writing it.
4. Submit a **PDF** file by email to `mdomarat@cs.umanitoba.ca`. Please name your file `A7FirstName.pdf` (e.g., I would submit a file called `A7Mike.pdf`).
